ABOUT MEDISEARCH

Medisearch is a user-friendly, comprehensive website designed to empower individuals and families in their healthcare journey. Our intuitive platform lets you search for doctors by location and specialty, and even read patient reviews. We also offer a hassle-free appointment booking system, allowing you to schedule visits with your chosen healthcare providers effortlessly.

OBJECTIVE

- Facilitate Access to Healthcare
- Streamline Doctor Search
- Offer Convenient Appointment Booking
- Data Security and Privacy
- Partnerships with Healthcare Providers

TECHNOLOGIES TO BE USED

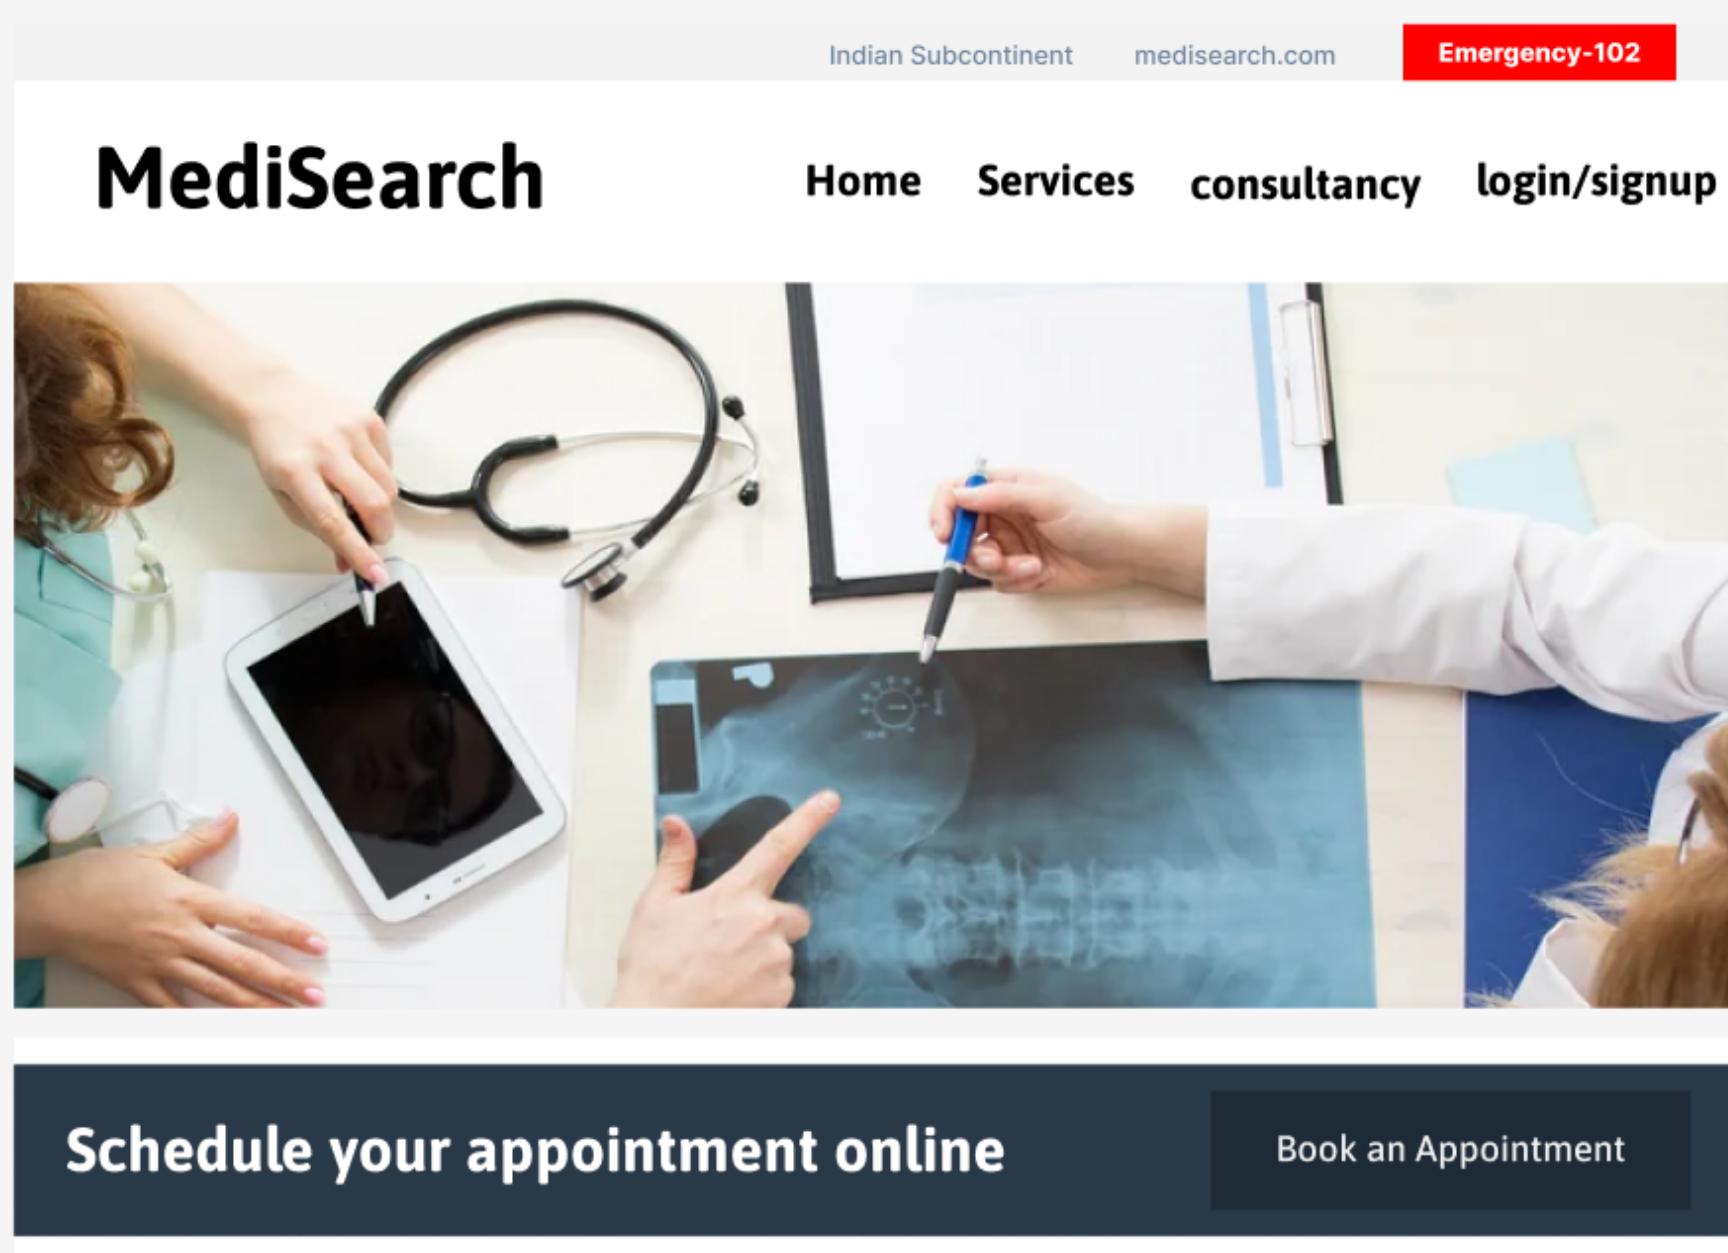

- Front-end Development: HTML, CSS, JavaScript, and popular JavaScript libraries or frameworks such as React, Angular, or Vue.js for building the user interface.
- Back-end Development: A server-side scripting language like Python, Ruby, or Node.js along with a web framework (e.g., Django, Ruby on Rails, Express.js).
- Database Management: Relational database management systems (RDBMS) like MySQL, or NoSQL databases like MongoDB to store user data, doctor profiles, and appointments.

FEATURES

- Doctor Search and Listings
- Appointment Booking
- Health Education Resources
- User Accounts and Profiles
- Emergency Services Information
- Appointment History and Medical Records

PROTOTYPE
